

Please do not let the FCC pass any laws that would allow more solicitors to call my house. Indiana's Telephone Privacy law should not be lessened for the sake of the telephone marketers. The worst part about the phone calls is that if no one is home to answer them, they automatically hang up and dial back again.....leaving you a bunch of hang-up calls on your answering machine.

Just thinking of how you'd like to have your elderly mother harrassed by these calls should be enough to want them stopped.
